

Typical PA System

The i-ceilings concept allows for 'invisible' loudspeaker solutions which benefit from greatly increased sound dispersion, providing incredibly even levels of sound reproduction compared with the 'hot and cold spots' associated with traditional 'cone' loudspeaker technology.

Due to their aesthetic and acoustic qualities, i-ceilings Sound Panels are ideal in education, retail, boardrooms, offices, call centres, healthcare, hospitality and leisure, ensuring even coverage of high quality music and voice reproduction without compromise to the architectural environment.

- Completely 'invisible' loudspeaker solution
- Installed up to 75% faster than standard ceiling speakers
- Unparalleled levels of intelligibility and dispersion of sound

Installation example:
Nottingham Magistrates Court

Product:
i-ceilings CS-1000, Ultima Tegular

Nottingham Magistrates Court features i-ceilings throughout the complex to provide a fully featured PA and Voice Evacuation System.
