**i-ceilings**, a new generation in integrated sound systems, use state-of-the-art technology to provide exceptional sound qualities without spoiling the aesthetic consistency of the ceiling plane.

Combining the experience of the world's leading suppliers of ceiling systems with the benefits of NXT technology, Armstrong World Industries has produced a new concept in acoustic ceilings.

i-ceilings provide a very high quality sound system for background music, public address and active acoustics such as sound masking. benefits include fast installation and excellent dispersion characteristics. Systems are further enhanced by the specially-developed i-ceilings range of analogue and digital amplifiers and processors and sound masking software.
