Digital CCTV Systems

The EAZEO range from BOSCH provides a reliable system that's not only easy to operate but features a range of options to suit individual needs. A 3 year warranty comes free.

▪ Multiplexer System

The 14" monitor has inputs for up to eight cameras. A multiplexer enables the user to choose full screen, four cameras in quad (2x2) or eight cameras in a 3X3 matrix. Images in full colour can be recorded using an analogue or digital recorder. "Motion detection" automatically senses movement and selects camera inputs accordingly. An intercom facility means that the system also be used for door entry systems.

▪ Camera Choices

Cameras have an inbuilt microphone to transmit audio. Fixed or vari-focal lenses are selected for each application. An iris lens is available to compensate for changing light levels. Outdoors, cameras are protected by housings with an IP55 rating.

▪ Digital Recording

Choose from either continuous or time-lapse recording. Clear on-screen menu. Real time viewing over the internet. Easy to transfer clips via compact flash cards.

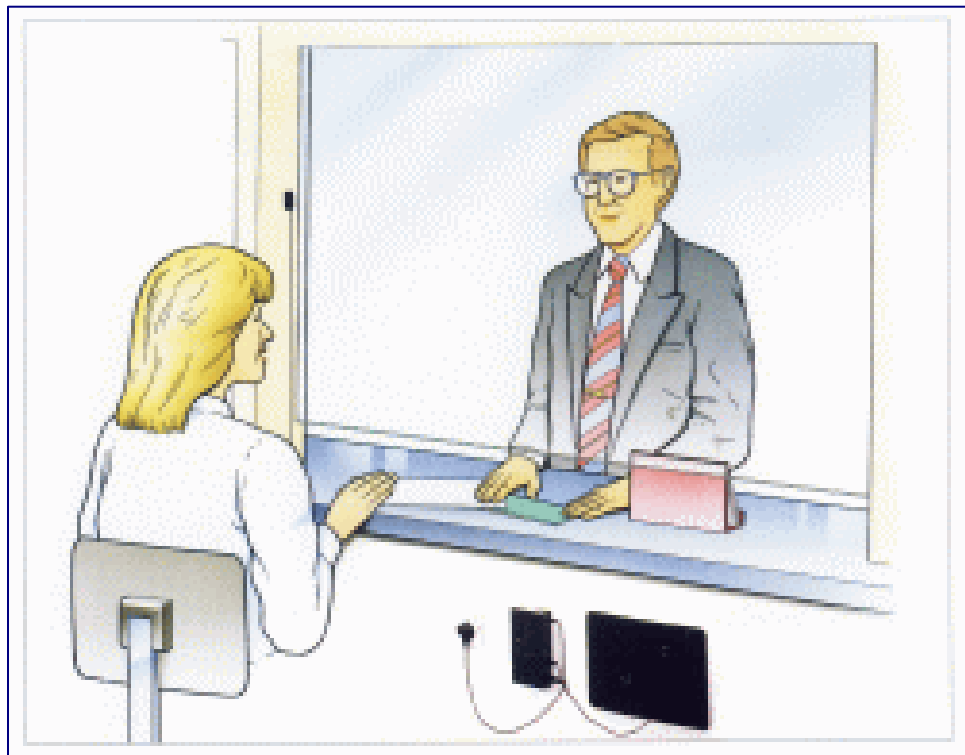

- MVS supply the full range of BOSCH and other CCTV systems.
- MVS offer a standard package that's easy to install and setup.
- MVS can also install all of the equipment.
- MVS can advise on complex applications and design a system for your project.

Induction Loop Systems

The design and installation of effective Induction Loops or Infra-Red systems is a specialist area and MVS' specialist experience in retail installations ensures that customers are provided with a cost effective reliable solution.

Induction Loops enable hearing aid users to hear important announcements and to hold perfectly ordinary conversations.

"The Disability Discrimination Act 1995 places an obligation on all organisations to provide facilities for disabled people. Deaf, deafened and hard of hearing."
